Subject: RE: Additional USS Lead water data

Hi Karen and Jeff,

Please see attached for the sites that we have received new full final data since 1/24. This should be the last “update” for a while. There are 2 sites that have not yet been sampled post-excavation, so it will be a little bit until we would potentially get that data (after sampling is completed). All other data is now final.

Please let me know if you have any questions or need anything else.

Thanks,

Val

As of today, all collected results are final, and all final results have been sent to the East Chicago residents via regular mail.

Here is an update on the letters sent:

- 41 sites with “Final” memos with all results final, of which 21 were placed in the mail last night
- 2 sites with “Final” memos with pre-excavation results (3106 on 1/20 and 3113 yesterday), but post-excavation sampling has not yet been completed.

The “master spreadsheet” on Sharepoint has been updated, and copies of the letters/memos have been saved to Sharepoint.
